Teaching Garden
2nd Grade Journal

My Name: __________________________
My Class: ___________________________
Lesson 1: Have to Have a Habitat
Design a travel poster or advertisement to encourage an animal to come visit our garden habitat. Remember to include what kind of food, water, shade, shelter, and other features our garden might have, and a picture!
Lesson 2: Design a Cactus

Draw what your cactus looked like

What special features would you give your cactus to help it survive?
Lesson 3: The Dirt on Dirt

Fill in the blanks with vocabulary you learned during the lesson and then find each word in the word search!

_________ is the process of rocks being broken down into dirt. It happens slowly using __________ or water. The process of the soil moving is called ___________. The difference between dirt and ___________ is that one contains living material. Living material is also called ___________. When soil is formed from decomposing food scraps it is called ___________. This keeps the scraps from taking up room in a ___________. Composting with worms is known as ___________.
